

# The only thing guaranteed about carbon steel fasteners...

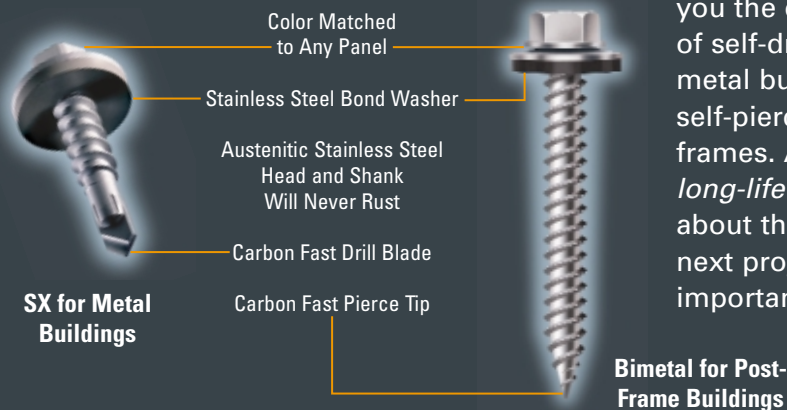

## they will rust.

Today's **stainless steel fasteners** from SFS intec give you both rust protection and the easy installation you associate with carbon steel. Protecting the head ensures appearance. Protecting the shank ensures

*the life of your building.* And now austenitic (300 series) **stainless steel fasteners** give

you the convenience of self-drilling for metal buildings and self-piercing for post frames. Ask the *long-life* experts about them for the next project that is important to you.

**Contact the stainless steel experts at SFS intec for more information on true long-life fasteners—call:**
